

MediScan AI - Patient Medical Report

Patient: C:\Users\uthil\Downloads\report1.jpg

Report ID: 48

AI Summary Suggestion:

Of course.

DIAGNOSIS

The report's main conclusion is "No evidence of active disease." This is a reassuring result.

The specific findings noted are:

Degenerative changes in the spine: This means there is age-related wear and tear on the spinal bones.

Mild tortuosity of the descending aorta: The largest artery in the chest is slightly twisted or winding, which is a common finding.

2.

CAUSE

The degenerative changes in the spine are a normal part of the aging process.

The mild tortuosity of the aorta is also commonly associated with aging and can be related to long-term high blood pressure.

3.

SUGGESTION

You should schedule a follow-up appointment with the doctor who ordered the report. While the findings show no active disease, the doctor will discuss what these results mean in the context of your overall health and the reason the scan was ordered in the first place.
